BQ CladMax Ultra Light

Lightweight composite garage door cladding for new and retrofit residential door applications.

Australian Made

Composite cladding

Garage doors

Low maintenance

DESIGN GUIDE

BQ-CLADMAX-DG
Version 1.0 | Demo

Timber-look garage doors without the weight.

PRODUCT OVERVIEW

BQ CladMax Ultra Light is a lightweight co-extruded composite cladding system engineered for residential garage roller door panels. A low-density timber fibre core and thin-wall polymer cap layer deliver a clean timber-look finish while helping remain within typical door motor weight tolerances.

IDEAL APPLICATIONS

- Residential garage roller door upgrades
- New architectural garage door panels
- Retrofit timber-look facade refreshes
- Vented garage door detailing
- Contemporary homes and alfresco-facing garages

COLOUR OPTIONS

Standard Slat
