

BQ FibreLine VGroove Panel

Pre-primed fibre cement cladding sheet with machined vertical V-grooves for a clean, modern linear exterior.

Modern vertical cladding

BQ FibreLine VGroove Panel creates a crisp vertical facade with regular machined grooves. Suitable for contemporary residential elevations, entry zones, extensions and feature walls.

Design notes

Use 133mm grooves for a finer linear rhythm. Use 200mm grooves for a calmer, broader facade expression. Supplied pre-primed for site painting.

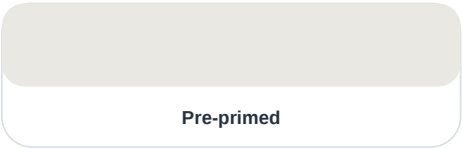

Applications

External wall cladding	Feature facade zones	Upper storey elevations	Entry and courtyard walls
------------------------	----------------------	-------------------------	---------------------------

Profiles

Profile	Nominal Sheet Size	Thickness	Code
133mm VGroove	2400mm x 900mm	9mm	BQ-FL-VGP-133-2400
200mm VGroove	2400mm x 900mm	9mm	BQ-FL-VGP-200-2400

Finish

Accessories: FC Nail 30mm x 2.8mm, FC Joint Sealant 300mL, Cut End Sealer 250mL, Aluminium Jointer Bead 3000mm.
